THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U.S.C., 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED. HOWEVER INFORMATION CONTAINED IN BODY OF THE FORM MAY BE UTILIZED AS DEEMED NECESSARY BY THE RECEIVING AGENCY.

THIS IS UNEVALUATED INFORMATION FOR THE RESEARCH
USE OF TRAINED INTELLIGENCE ANALYSTS

50X1-HUM

Dr. Lindner: In March 1948 the Berliner Zeitung announced that Dr. Lindner, a former AEG research worker, had invented a stereo-electron-microscope in Moscow. The central office of the AEG in Berlin, however, states that Lindner was never employed by the AEG and believes the inventor to be Professor Manfred von Ardenne.

Director Flötgen: A specialist in insulation materials; formerly with the AEG in Hennigsdorf and now in Moscow.

Dr. Kienast: Formerly director of the Welding Machine Works in Hennigsdorf (probably Mitteldeutsche Stahl- und Walzwerke); now in Moscow.

Prof. Alfred Klose: Formerly of the testing and target grounds in Kunmersdorf. He had been a member of the NSDAP and after 1945 he worked for the SMA by helping to register and classify the available files and material of Kunmersdorf. He went to the USSR in 1946 and is believed to be occupied with calculations on the German tests of a special steel-bursting grenade (grenade filled with highly compressed air). He is now in an institute near Moscow.

Gerhard (title and status unknown): Was formerly connected with German searchlight development and went to the USSR with Professor Vlose.

Director Pfalzgraf: Specialist in submarine batteries. He lived in Frohnau until 1945 and now works in Kronstadt. He was formerly chairman of the German Akkumulator-Ring.

Professor Dr. Haban: A specialist in magnetron tubes who was deported from Berlin-Treptow on 22 October 1946. He now works in Odessa in the infra-red ray development station. With him is the staff of the German infra-red laboratory and its equipment, which was captured on Bornholm Island in 1945.

Dr. Schiller: Scientific manager of the AEG plant in Thalheim, Saxony, who left for Leningrad at the end of April 1948. Shortly after his departure, dismantling of the plant began.

2. Professor Justin Kleinwachter (deceased): Formerly Landesgruppen-Bauprüfer of the Air Group Silesia and chief of the Plane Test Group Breslau; also operational and research engineer with the AEG and I.G. Farbenindustrie. His last post was in the Danzig Air Institute. He was scheduled to go to the USSR, but died in Germany in 1946.
